# Our products bring even more variety to your range

**As different as people are, so too are their tastes. What we like and what we do not like is often already decided during childhood, a formative time for our sense of taste. Our origins and the places where we live have a major influence on our preferences. But our product portfolio has something for everyone.**

## **Product development**

Each of our products has a long history behind it. We start by developing and comparing different recipes. In dialogue with our customers, we vary classic recipes or embrace nutritional trends and develop new ideas. Only when we are completely satisfied with the results are new products added to our portfolio.

## **Product variety**

The baker knows best what his customers want. A multitude of raw materials, sourdoughs, special pre-mixes for bread, rolls and pastries, as well as other fine baked goods, flavours, fillings and bread spices are available to choose from. These are produced with the greatest care, and many of them are also available in organic quality.
